ABOUT ME

I am flexible, reliable, self-motivated and hard-working. my personal understanding about Computer Science and engineering are from Royal University of Phnom Penh. I love challenging myself and solve all the problems I've faced at school with creative ideas as well as critical thinking, more than that I love to help others when they need helps with their school works or projects. "the more errors and challenges I face, the more I am able to learn"

EXPERIENCE

C/C++ Teacher

Study Club Royal University Of Phnom Penh

2025 - 2026

This experience helped me improve both my technical skills and my way of thinking as a developer such as:

- I learned how to prepare and understand program structure in C/C++. I understand how to organize code properly by separating it into header files (.h) and source files (.cpp), and how to manage projects using Makefile or CMake so the code is scalable and easy to maintain.
- I learned how to work with memory management. I now know how to allocate and free memory using malloc/free in C and new/delete in C++, handle pointers correctly, and avoid common issues such as memory leaks, dangling pointers, and buffer overflow.

EDUCATION

2023 - Present

Royal University Of Phnom Penh(RUPP)

Bachelor of Computer Science

(Year 3, semester 2)

2025 - Present

Study Mobile App Flutter at ANT Training

Technology Center(Scholarship From MPTC CBRD)

2017 - 2023

Kampot Krong Cambodia Japanese Friendship

Hight school Graduated BacII

Project In School

App Name : គេ:ទិញទំនិញ

Project Title:

គេ:ទិញទំនិញ : E-Commerce Shopping Application

Project Overview: គេ:ទិញទំនិញ is an e-commerce mobile application developed using Flutter, aimed at helping users discover and purchase products easily and conveniently. The app uses Get Storage for local data management to deliver a fast, responsive, and reliable shopping experience.

Authentication:

- Secure user login and registration system built with Flutter and GetStorage to save and manage user session data locally.

Product Listing & Categories:

- Displays a wide range of products organized by categories, allowing users to browse and explore items easily and efficiently.

Search Products:

- Enables users to quickly find specific products by name or keyword, improving navigation and overall shopping experience.

Favorites / Wishlist:

- Users can save their favorite products to a wishlist for easy access and future purchase consideration.

Shopping Cart:

- Users can add, remove, and manage products in their cart before proceeding to checkout.

Order History:

- Users can view their past orders and track previous purchases within the application.

Profile Screen:

- Users can view and manage their personal account information, including name, email, and app preferences such as language and appearance settings.

App Name : Todo-List

Project Title:

ToDo-List : Task Management Application

Project Overview: ToDo-List is a task management mobile application developed using Flutter with GetX for state management, GetStorage for local data persistence, and Dio for HTTP communication with a FastAPI backend. The app is aimed at helping users organize and manage their daily tasks easily and efficiently, delivering a fast, responsive, and reliable experience.

Authentication:

- Secure user login and registration system built with Flutter and connected to a FastAPI backend using Dio, allowing users to access their personal tasks safely and securely.

Create Task:

- Users can create new tasks by providing a title, description, category, and due date, with data sent and stored through the FastAPI backend.

Edit Task:

- Users can update and modify existing tasks at any time to keep their information accurate and up to date.

Delete Task:

- Users can remove tasks that are no longer needed, keeping their task list clean and organized.

Project In School

Mark as Complete:

- Users can mark tasks as completed to track their progress and stay motivated throughout the day.

Categories:

- Tasks can be organized into categories, allowing users to group and filter their tasks easily for better management.

Due Date / Reminder:

- Users can set due dates on tasks to manage deadlines and prioritize their work effectively.

App Name : CamExplore

Project Title: Cambodia Tourism Explorer Application

CamExplore Video Link : <https://www.facebook.com/share/v/1Dbgdexqhz/>

Download CamExplore(Android Phone) : [CamExplore_APP](#)

Project Overview: **CamExplore** is a tourism mobile application developed using Flutter, aimed at helping users discover and explore beautiful travel destinations and the rich cultural heritage of Cambodia. The app uses SQLite for local database management and Shared Preferences for storing user settings and session data, delivering a smooth, responsive, and reliable experience for travelers and culture enthusiasts.

Authentication:

- Secure user login, registration, and forgot password system built with Flutter and SQLite, allowing users to safely access and manage their personal account within the application.

Profile Settings:

- Users can view and manage their personal account information, including editing profile details and changing their password directly within the app settings.

Explore Places:

- The app displays a wide range of tourism destinations and cultural sites across Cambodia, allowing users to browse and discover places easily with detailed information and visuals.

Favorites:

- Users can save their favorite travel destinations for quick and easy access, allowing them to plan and revisit places of interest at any time.

Rate Place:

- Users can rate tourism destinations and cultural sites, helping the community discover the best places to visit across Cambodia.

Dear Sir/Madam,

I am writing to express my interest in the Developer position at ACLEDA Bank Plc. With a strong foundation in software development and a growing passion for building reliable and secure applications, I am excited about the opportunity to contribute to your technology team.

My name is Keat Somarina, and I am currently a Year 3, Semester 2 student majoring in Information Technology at the Royal University of Phnom Penh. I have hands-on experience in application development, particularly in mobile and backend-related projects. I have worked with technologies such as Flutter, Firebase, RESTful APIs, and Get Storage, and I am familiar with object-oriented programming principles, clean architecture, and version control using Git. Through my academic projects and self-learning, I have developed strong problem-solving skills and an ability to quickly adapt to new technologies.

I am especially interested in working at ACLEDA Bank Plc because of its strong reputation in the financial sector and its commitment to digital innovation. I understand the importance of security, accuracy, and performance in banking systems, and I am motivated to develop software solutions that are reliable, scalable, and user-focused.

In addition to my technical skills, I am a responsible and motivated individual who enjoys teamwork and continuous learning. I am confident that my enthusiasm for software development, combined with my willingness to learn and improve, would allow me to be a valuable addition to your organization.

I am particularly interested in this opportunity because it aligns with my goal of growing as a Flutter Developer and contributing to meaningful projects that positively impact users. I am eager to apply my technical skills, creativity, and dedication to help your team build reliable and engaging mobile applications.

Thank you for considering my application. I would welcome the opportunity to further discuss how my skills and interests align with the goals of ACLEDA Bank Plc. I look forward to your positive response.

Sincerely,

A stylized, handwritten signature in black ink, appearing to read 'Keat'.
